STREET ART MURALS

Independent french artist born in 1983

BIOGRAPHY

Alex Kanos is a french street artist specialized in large-scale murals. his main concern is located in the heart of the city, where codes are upset, overlap and disappear. The street digests everything and takes on different appearances over time.

He mixes organic characters with mecanic and urban elements. It gives a vision of our future, with machine and human melting in one new species. Could we keep our goodness, decency and humanity through this change?

Very inspired by Alfons Mucha and Cyberpunk movement, Kanos tries to describe next challenges we will have to face in the coming centuries. Alex Kanos "iKanoGrafik" continues to intervene on & in the city.

FORMATION

DNSEP (Master) Cambrai 2008

“Fragments of towers buildings flush with contours of certain lettering, real contextualizations of graffiti in space: it is no longer just the style that is embedded in the city, but the city that is embedded in the style, and by the same in the soul and the flesh of the one who paints it in his name.”

*Chrixcel
Pyrénées, un sommet du graff
Critères Éditions*
